“Opening Gates to a Community Haven”

The concept revolving in this project is to Restore and Rebuild the sense of community with the Rich Culture and Heritage of the Tamil community in Jaffna. The essence of the “Parampare Weedu” translating to “Ancestral Home” was to highlight what a tightly knit unit the family is to the Tamils.

This wholesome idea is achieved with all the activities around a Central Courtyard which connects all spaces and acts as the Heart of the Home. The breach in the families is restored and consolidated by the people themselves, and this community housing project uplifts them and recreates the sense of Community along with the integration of the Rich Culture, Heritage and Language.

A significant feature is that the zoning within the premises is done based on the topography, cross ventilation and taking into consideration other natural elements such as sunlight etc. The entire scheme is landscaped to achieve shade and many green areas which will be soothing to view, and act as a form of relaxation for every day living purpose. The internal road network has a notable width providing ease for commuters to travel back and forth along with safe space for pedestrians and cyclists. Furthermore, the design of individual house units are detached from each other providing the necessary privacy but uniting them all in once scheme altogether.

Heart of the Home

The love and unity in this family is more obvious because they live together and see each other every day. The breach and distancing of such families has been restored with a perfect balance due to the design of the homes and the facilities in this scheme. The central courtyard, the Pooja area along with the other faculties and characteristics in the designs of these houses enhances the lifestyle of these inhabitants and improves the bonds and unity of the families living within it.

Memories rekindled to priceless movement

All the familiar sights, sounds, and smells are a priceless reality in this peaceful and tranquil city complex. The fond memories of having Rio ice cream on a hot midsummer day, the sound of the Kovil bells ringing, the festivities, and the authentic delicious food are just another day in this beautiful housing scheme.

The serene sound of the Kovil bells ringing and the smell of fresh Jasmine (Malliya Pu) in the air and such fond memories have all been restored when you enter the haven of this gated community housing scheme.

The fond memories of meeting and greeting familiar faces within the Nallur city and enjoying Rio ice cream on a midsummer day, are not a dream anymore, it's priceless because we can live it, in reality, in this beautiful and safe city complex.

Life in Jaffna now is as if it were the days before the Riots and Civil war. The aftermath of the 1983 riots resulted in a handful of affluent people from amongst the Tamil community to migrate and flee as refugees and immigrants to other countries. The less fortunate who were left behind, with no luxury of choice, were segregated by the Civil War to follow into the 1900's.
